Presented by the New Hampshire Society of Health-System Pharmacists

Monday, October 10<sup>th</sup>, 2022

The Puritan Conference Center, 245 Hooksett Road Manchester, NH 03104

## Objectives

**Opioid Use Disorder Prevention, Treatment and Recovery: an ever evolving challenge**

- Explain the current data around opioid use disorder and other related indicators
- Familiarize participants with the NH Opioid Crisis Dashboard
- Provide actionable ways pharmacy staff can abate the Crisis

**ISMP Targeted Medication Safety Best Practices for Hospitals 2022 –2023: An Update**

- Understand the purpose of the Institute for Safe Medication Practices (ISMP) Targeted Medication Safety Best Practices for Hospitals.
- Define ISMP's Targeted Medication Safety Best Practices for Hospitals.
- Describe updates to ISMP's Targeted Medication Safety Best Practices for Hospitals for 2022-2023.
- Execute a gap analysis of ISMP's Targeted Medication Safety Best Practices for Hospitals at a specific practice site.

**Drug therapy updates for the management of type 2 Diabetes**

- Review the current ADA guidelines for the management of type 2 diabetes to optimize outcomes in patients with type 2 diabetes and atherosclerotic cardiovascular disease (ASCVD), heart failure and chronic kidney disease.
- Identify drug therapy options for patients with type 2 diabetes to avoid hypoglycemia and weight gain, and minimize cost.
- Discuss best practices for the prevention and management of hypoglycemia and the role of the pharmacist.
- Utilizing patient cases, choose appropriate drug therapy for patients with type 2 diabetes and comorbid conditions.

**Choice of Thrombolytics – When, Where, and Why to choose Tenecteplase vs Alteplase**

- Recall the indications for and differences between alteplase and tenecteplase
- Discuss the evidence behind the use of tenecteplase as compared to alteplase for various indications
- Identify the benefits of using tenecteplase as compared to alteplase

**The Latest in Lipids: What's in, What's out, and What's up**

- Review guidelines for diagnosis and management of LDL-Cholesterol
- Determine patient goals for LDL-Cholesterol
- Discuss the new LDL-lowering medications
- Guide the audience in how can statin-intolerance can be managed
